

Public Information Meeting Notice

The Shasta County Environmental Health Division, as the Solid Waste Local Enforcement Agency, is proposing to issue a revised Solid Waste Facility Permit for the West Central Landfill located at 14095 Clear Creek Road, Igo, SWIS #45-AA-043. A meeting is scheduled to provide specific information to the interested public regarding this proposed permit revision.

Date: Wednesday, March 18th, 2015

Time: 6:00 pm

Place: Igo-Ono School Library
6429 Placer Road, Igo

The proposed permit revision will expand the West Central Landfill's perimeter boundary. Shasta County, who owns the landfill, has recently acquired 160 acres of land from the Bureau of Land Management. This land will serve as an additional buffer extending from the current landfill's western property line to Gas Point Road and to place gas monitoring wells on a portion of it. There will not be any other landfill-related activities allowed on this land. The landfill's Report of Disposal Site Information has been updated to describe the perimeter boundary expansion. This document, the proposed Solid Waste Facility Permit, a facility site map, and other pertinent facility information will be available for review at the meeting.

An incomplete application for a permit revision was originally received by the Shasta County Environmental Health Division on October 24, 2014. Operating and Closure documents were updated. The Operator has prepared an Environmental Impact Report (EIR) Addendum to the 2003 FEIR(SCH#2001112020) for this project. This Addendum was certified by the Shasta County Board of Supervisors on October 14, 2014. Environmental Health staff has reviewed the application package and deemed it complete and correct pursuant to applicable State regulations on February 24, 2015. With this determination and conducting an informational meeting, staff will forward the application and proposed permit to the California Department of Resources, Recycling, and Recovery for concurrence.

The informational meeting scheduled for March 18, 2015, is for all interested parties to provide comments on the Local Enforcement Agency's proposed action to revise the Solid Waste Facility Permit for the West Central Landfill. The facility owner and operator, along with Environmental Health staff, plan to introduce the project at the beginning of the meeting. Residents and other interested parties can provide comments, ask questions, and review landfill documents. Comments may also be submitted directly to the Environmental Health Division prior to the meeting. A summary of all comments received at this meeting will be forwarded to the California Department of Resources, Recycling, and Recovery along with the proposed permit.

Additional information can be obtained or comments submitted by contacting the Shasta County Environmental Health Division at 1855 Placer Street, Suite 201, Redding, CA 96001, 530/225-5787, Monday-Friday, 8am-5pm.

Additional information can be obtained by contacting the Shasta County Department of Public Works, 1855 Placer Street, Redding, CA 96001, 530/225-5661, Monday-Friday, 8am-5pm.

Public Resources Code, Section 44307 allows for appeals from the date of issuance of a permit contended by the applicant or any person requesting the enforcement agency review an alleged failure of the agency to act as required by law or regulation. A hearing shall be held in accordance with the procedures specified in Section 44310.
